SPECIAL ANNOUNCEMENTS

Full Data Compilation of $501-$999 Export Shipments to Countries Other Than Canada, Effective July 1981 Statistics

Beginning with the July 1981 statistics, export reports reflect fully compiled data for over $500 shipments to countries other than Canada. Prior to the July 1981 statistics, such data were fully compiled only for shipments valued $1,000 and over while shipments valued $501-$999 were estimated, based on a 50-percent sample. This change in method of compiling statistics for the $501-$999 shipments to countries other than Canada was made possible by the introduction of new automated processing procedures.

SPECIAL ANNOUNCEMENTS—Continued

Revisions to the Statistics on Exports of Domestic Merchandise Issued in the Calendar Year 1981 Reports

Due to technical difficulties, erroneous information is shown for certain Schedule B commodity numbers in the calendar year 1981 statistics. The amounts of overstatement (or understatement) for each commodity number and country of destination have been determined and are presented in the chart below.

Users should note that the figures followed by the minus sign (–) reflect the overstatements while data without a sign reflect the understatements and that they should make the necessary corrections for their own record and future reference.

Table 1. Schedule B Commodity by Country-Domestic Merchandise

EXPLANATION OF STATISTICS

COVERAGE

With the exceptions described below, U.S. export statistics record the physical movement of merchandise out of the U.S. Virgin Islands and the U.S. Customs territory to foreign countries, without regard to the method of financing or whether the exportation involves a commercial transaction.[1] The U.S. Customs territory includes the 50 States, the District of Columbia, and Puerto Rico. Exports from Puerto Rico to foreign countries are, therefore, included in the statistics. However, the statistics do not include shipments between the United States and Puerto Rico, between the United States and its outlying possessions (including the Virgin Islands), or between any of these outlying areas. This trade is reported separately in report FT 800.

Excluded From the Statistics

The following types of shipments from the U.S. Customs territory to foreign countries are excluded from the statistics:

1. Shipments to U.S. Armed Forces for their own use, including shipments to U.S. armed services post exchanges, etc., and a few other types of shipments for U.S. Government use which, though not consigned to our Armed Forces, are similarly identified with activities carried on for the direct benefit of the U.S. Government. For example, the following are excluded:
    a. Shipments of office furniture, equipment, and supplies for the use of U.S. Government offices.
    b. Shipments of food, medicines and related items, and other commissary supplies to U.S. Government offices or employees for their own use.
    c. Shipments for the construction and maintenance of U.S. satellite tracking stations in foreign countries.
    d. Shipments in connection with the U.S. Antarctic Research Program.
2. Merchandise shipped in transit through the United States from one foreign country to another, when documented as such through U.S. Customs. (Foreign merchandise that has entered the United States as an import and is subsequently reexported is not treated as in-transit merchandise, and is shown separately in this report as "Exports of Foreign Merchandise." Information on in-transit shipments arriving in or leaving the United States by vessel is published by the Census Bureau in report FT 985.)
3. Issued monetary coins of all component metals.
4. Bunker fuel and other supplies and equipment for vessels and planes engaged in foreign trade. (Information on bunker fuel is published monthly by the Census Bureau in report FT 810.)
5. Some shipments of relatively small significance, such as low-valued or noncommercial exports by mail, temporary exports and the return of temporary imports, household and personal effects of travelers, goods for the personal use of U.S. Government employees abroad, etc.

Included in the Statistics

Except for the exclusion of the types of shipments described above, all physical movement of merchandise (not including electrical energy) out of the United States is intended to be reflected in the statistics. The following are examples of some of the types of shipments included in the statistics which arise from other than strictly commercial sales of merchandise, or which are of such a nature that a question as to whether they are included might arise. Although none of these types of shipments is separately identified in this report, such information as is available regarding sources of separate information is given in the following list. In general, where data are not available for "noncommercial" types of shipments, it is because of practical difficulties in obtaining the separate information.

1. Effective with the statistics for January 1981, the regular U.S. export statistics will include data on exports from the U.S. Virgin Islands to foreign countries. This information has previously been available only in reference tabulations EM 591 (Monthly) and EA 691 (Annual).
2. Effective with the January 1978 statistics, exports of nonmonetary gold (in such forms as ore, scrap, base bullion, refined bullion, etc.), which were previously excluded, are included in the regular export statistics. Exports of silver in the above-mentioned forms have been included since January 1969. (Separate data on gold shipments were published in report FT 2402 through

---

[1] Since it is the movement of merchandise out of the United States that is being measured, the statistics do not include U.S.-owned or/-financed goods moving directly from one foreign country to another.

December 1974 and in report FT 990 from January 1975-December 1977. For additional information regarding the inclusion of gold in the statistics, see the Special Announcement in the January 1978 issue of report FT 410.)

3. Department of Defense Military Assistance Program—Grant-Aid shipments under the Foreign Assistance Act. (Separate totals for merchandise exported under this program are shown in monthly Census Bureau reports FT 900 and FT 990.)

4. Shipments of commodities for economic assistance under the Foreign Assistance Act. (Totals for exports under this program are presented in the March, June, September, and December issues of report FT 990.)

5. Shipments of agricultural commodities under P.L. 480 (Agricultural Trade Development and Assistance Act of 1954) as amended, and related laws. These laws provide for exports of agricultural commodities under various special U.S. Government arrangements, including: dollar credit sales to foreign governments or private trade entities; convertible local currency credit sales; donations of agricultural commodities exported in conjunction with cooperating sponsors, including friendly governments operating under bilateral agreements with the United States, nonprofit voluntary U.S. relief agencies, international organizations, and the World Food Program; and the Food for Development Program. (Exports by nonprofit voluntary relief agencies including, without separate identification, their exports under P.L. 480, are reported under Schedule B numbers specifically provided for such exports. Quarterly value totals for exports under P.L. 480 are presented in the March, June, September, and December issues of report FT 990. Additional information on exports under P.L. 480 and related laws may be obtained from the Economic Research Service of the Department of Agriculture.)

6. All other types of U.S. Government shipments not described above as excluded.

7. Intracompany shipments—that is, shipments of merchandise by a company in the United States to a branch, affiliate, or parent of the same company in a foreign country.

8. Purchases made in the United States by representatives of foreign countries for foreign governments or firms, exported by the representative to his own or a third country.

9. Sales of U.S. vessels to purchasers in foreign countries.

The Bureau of Economic Analysis of the Department of Commerce publishes statistics and analyses on the balance of payments of the United States covering all international transactions, including information on Government military and economic assistance extended to foreign countries; military expenditures abroad; Government and private capital movements; receipts and payments for services such as investment income, travel, transportation, etc. Other interpretative and analytical information on U.S. foreign trade is prepared in the Department's Industry and Trade Administration.

SOURCE OF INFORMATION

The official U.S. export statistics are compiled by the Bureau of the Census primarily from copies of Shipper's Export Declarations which are required to be filed with Customs officials, except for Department of Defense Military Assistance Program Grant-Aid shipments which are reported directly to the Bureau of the Census by the Department of Defense and shipments by qualified exporters who have been authorized to submit data in the form of magnetic tape, punched cards, or monthly Shipper's Summary Export Declarations directly to the Bureau of the Census.

DEFINITION OF EXPORTS OF DOMESTIC AND FOREIGN MERCHANDISE

Exports of domestic merchandise include commodities that are grown, produced, or manufactured in the United States, and commodities of foreign origin that have been changed in the United States from the form in which they were imported, or that have been enhanced in value by further manufacture in the United States. Sugar refined in this country from imported raw sugar, flour ground from imported wheat, and ores or metal smelted or refined from imported ores or metal are examples of commodities considered to be domestic for statistical purposes when exported to a foreign country. Also, when material or parts of foreign origin are imported into the United States and incorporated with material or parts produced in the United States, the complete product is considered to be a domestic product and the imported parts lose their identity as foreign merchandise. Exports of foreign merchandise, shown in table 5, consist of commodities of foreign origin that have entered the United States as imports and, at the time of exportation, are in substantially the same condition as when imported.

MONTHLY AND ANNUAL CARRYOVER

It is the objective of the compiling procedures to include shipments, insofar as practicable, in the statistics for the actual month of exportation. For purposes of the statistics, the month of exportation is generally based on the date when the shipment leaves the United States. (For vessel or air shipments it is the date when the carrier departs or is cleared from the port of export.) However, because of processing problems (e.g., late receipt of a document for an end-of-month shipment, rejection of a shipment by the computer because the data fail to meet certain edit criteria established to protect the accuracy of the statistics, etc.), there is an overall average carryover of about 2 to 3 percent (in terms of value) of the shipments from the actual month of exportation to a subsequent month, usually the succeeding month. Normally the amount of carryover from month to month and year to year remains substantially constant so that comparisons of overall totals from period to period are not unduly affected. However, monthly or yearly comparisons of individual commodities may be affected since statistics for a given period may include some shipments made during a previous period without a corresponding carryover to the following period.

VALUATION

The value reported in the export statistics generally is **equivalent to an f.a.s. (free alongside ship) value at the U.S. port** of export, based on the transaction price, including inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation. The value, as defined, excludes the cost of loading the merchandise abroad the exporting carrier and also excludes freight, insurance, and any other charges or transportation costs beyond the port of exportation. However, it is recognized that the statistics may not always reflect the value as defined above, as exporters sometimes find it difficult to assign a value in accordance with this definition. For example, the export value for a rail or truck shipment from an interior U.S. point to an interior point in Canada or Mexico should include freight and other charges to, but not beyond, the border port of exportation. In some instances, however, the value reported by the shipper may completely exclude such charges (particularly where the usual price quotation is f.o.b. an interior U.S. point) or, on the other hand, may reflect the cost of delivering the merchandise to the foreign place of destination. For vessel or air shipments, the value reported on the declaration may include ocean or air freight and insurance charges beyond the-port of export, which should not be included. For certain types of transactions, the export value may be difficult to determine, as in the case of shipments from a business concern to its own subsidiary or affiliate abroad. The extent to which the statistics reflect the stated value definition depends largely upon the accuracy of reporting by shippers on their export declarations.

COMMODITY INFORMATION

Commodity Classification

The export statistics are initially collected and compiled in accordance with the commodity classifications in Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States. Effective with the January 1978 edition of Schedule B, the export classification schedule is based on the organizational framework of the import classification system in the Tariff Schedules of the United States Annotated (TSUSA). Schedule B consists of 8 major commodity sections, Schedules 1 through 8, following the general outline of the TSUSA. The numbering system for Schedule B also is based on the TSUSA. (For the presentation of data in other reports effective with the January 1978 statistics, the Schedule B classifications have been converted, on a one-for-one basis, to a new classification system–Schedule E, SITC Based Classification of Domestic and Foreign Commodities Exported from the United States, which is based on the Standard International Trade Classification (SITC), Revision 2.[2] The compilation of export data in terms of classifications related to the SITC, i.e., Schedule E classifications, permits comparison of U.S. export statistics, insofar as possible, with the foreign trade statistics compiled by other trading nations.)

Some of the commodity descriptions in this report are necessarily abbreviated to save printing costs and therefore, in many cases, they do not contain all of the qualifying information necessary to define completely the commodity for which statistics are shown. For complete definition of the individual Schedule B commodity classifications, reference should be made to Schedule B.

The omission of a commodity number from this report does not necessarily mean that there were no shipments of the commodity made during the month. It is possible that some shipments of the commodity valued **$501-$1,999** to Canada or **$501-$999** to other countries may have been made but not selected in the sample of such shipments, while shipments valued under **$501** are not reported by commodity. (See the explanation of sampling procedures elsewhere in this explanation.) It is also possible that shipments were made during the given month but not included in that month's statistics due to carryover. (See the section of this explanation entitled "Monthly and Annual Carryover.")

Difficulties in Obtaining Correct Commodity Classification

There are obviously substantial difficulties to be faced in obtaining the correct commodity classification in terms of the Schedule B classifications. Errors may be made in the classification by reason of lack of care on the part of the shipper, misunderstanding and confusion as to where particular products are to be classified, etc., and these errors may not be detected during the compilation of the statistics. It has been observed that, in those cases where a general "basket" classification exists for a commodity, shippers often report merchandise under the "basket" classification rather than under a specific commodity classification. To the extent that such misreporting is not detected, the "basket" classification tends to be overcounted with the result that specific classifications tend to be undercounted.

Shipments Not Classified by Commodity

Data on shipments valued $500 and under are included in this report under Schedule B number 818.9000 without classification by commodity, effective with the March 1979 statistics (under $251 prior to March 1979). Classifications other than 818.9000 exclude information on these low-value shipments and, therefore, are undercounted to the extent that such shipments of the commodity are made.

---

[2] United Nations Statistical Papers, Series M, No. 34/Rev. 2

Shipments of commodities donated for relief or charity purposes by individuals or private agencies are reported under classifications specifically provided for them and are excluded from the statistics for other commodity classifications. In addition, in the case of some commodities, notably clothing, items of a military type are not included in the statistics as exports of that commodity but are separately reported as military-type items in classifications provided for them. For more specific information on these exceptions to the usual classification of exports by commodity, reference should be made to Schedule B.

COUNTRY OF DESTINATION

The country of destination is defined as the country of ultimate destination or the country where the goods are to be consumed, further processed, or manufactured, as known to the shipper at the time of exportation. If the shipper does not know the country of ultimate destination, the shipment is credited to the last country to which the shipper knows that the merchandise will be shipped in the same form as when exported. It follows, therefore, that the statistics will tend to be overcounted for shipments to transshipment countries such as Hong Kong, Belgium, Netherlands, etc., and undercounted for other countries. Further, since the statistics reflect the country of destination only as known to the exporter at time of shipment, the statistics will not reflect any diversions made after the shipment leaves the United States.

Countries and territories for which export data are compiled are listed in Schedule C-E, Classification of Country and Territory Designations for U.S. Export Statistics. Countries are listed in sequence within continents generally from north to south and west to east. Country names that are abbreviated in this report to save space are shown in full in Schedule C-E. Copies of Schedule C-E are available free upon request to the Bureau of the Census.

No country of destination information is shown for exports of Special Category commodities. (See Security Restrictions on Publication of Information.) For other commodities, the omission of a country name does not necessarily mean there were no exports of the commodity to that country. Data are shown by country in those cases where exports of the commodity to the country average $5,000 or more per month, on a cumulative year-to-date basis. To save printing costs, commodity by country data averaging less than $5,000 per month are grouped together and shown as a total, identified as OTH CTY (Other Countries) at the end of the list of countries for the commodity. The designation UNIDENT (Unidentified Countries) is used to reflect transshipments of certain grains and oilseeds through Canada for which the country of ultimate destination is not known at the time of shipment from the United States. For additional information, see the Special Announcement in the January 1977 issue of report FT 410.

SECURITY RESTRICTIONS ON PUBLICATION OF INFORMATION

For certain commodities, referred to as Special Category commodities, security restrictions prevent the release of country of destination information, but information on total exports is permitted to be released. For each Schedule B number which is classified as a Special Category commodity, data showing total U.S. exports of the commodity to all countries combined is presented, without any information on exports of the commodity to individual countries. A list of the Schedule B numbers which are classified as Special Category commodities may be obtained from the Bureau of the Census.

SAMPLING PROCEDURE FOR ESTIMATING DATA FOR CERTAIN LOW-VALUED SHIPMENTS TO CANADA AND OTHER COUNTRIES

General Description of Compilation and Estimation

Effective with the statistics for March 1979, the lower limit of the value ranges for estimating data for low-value export shipments has been raised from $251 to $501. For countries other than Canada, effective with March 1979 statistics, data for shipments valued $501-$999 (formerly $251-$999) are estimated, based on a 50-percent sample of such shipments. As in the past, these estimates are combined with data for shipments valued $1,000 and over, which continue to be fully compiled. For Canada, effective with the March 1979 statistics, shipments valued $501-$1,999 ($251-$1,999 prior to March 1979) are estimated, based on a 10-percent sample and are combined with fully compiled data for shipments valued $2,000 and over. The estimates are reported under the special Schedule B number 818.9000 and excluded from other commodity classifications. The $501-$1,999 shipments to Canada plus the $501-$999 shipments to other countries represent about 3 percent of the total value of exports, and the under-$501 shipments represent about 1 percent.

Sampling and Estimating Procedure

The estimated data for shipments to Canada valued $501-$1,999 and for shipments to other countries valued $501-$999 are based on individual items selected in the sample. The sample of individual items is selected by designating samples of declarations from which the appropriate items are taken. The mechanics of the sampling and estimating procedure are as follows:

> After declarations with no items valued over $500 are set aside, two samples of declarations are designated from the entire group of declarations remaining. One is a 10-percent sample of the declarations (every tenth declaration) in the entire group. From this 10-percent sample all items valued $501-$1,999 for Canada are selected each month. The other document sample is a 50-percent sample from the entire group (every second declaration). From this document sample all items valued $501-$999 for countries other than Canada are selected. During the tabulating process, the statistical data for the sample shipments to Canada are multiplied by 10 and the statistical data for the sample shipments to countries other than Canada are multiplied by 2. The inflated data for the sample shipments are combined with the data for the fully compiled shipments to obtain the various commodity, commodity by country, and other totals.

Form of Presentation of the Export Data

As stated under Country of Destination, for individual Schedule B commodity classifications, information for each country of destination is shown in this report where exports of the commodity to the country (fully compiled and estimated data combined) average $5,000 or more per month on a cumulative year-to-date basis. To save printing costs, commodity-by-country data averaging less than $5,000 per month are grouped together and shown as a total, identified as OTH CTY (Other Countries), at the end of the list of countries for the commodity. The country of destination detail for data included in the OTH CTY total is available without charge in reference tabulations or it can be supplied upon request, possibly with a charge for the work involved.

Under these "basketizing" procedures, the absence of a country name from the statistics for a commodity does not necessarily mean that there were no shipments of the commodity to that country, but does indicate that the total value of shipments of the commodity estimated for the country (including the fully compiled and the estimated data) averages less than $5,000 per month on a cumulative year-to-date basis. Even in the case of commodities where no OTH CTY total is shown it is possible that some shipments individually valued under $2,000 were made to Canada and that some shipments individually valued under $1,000 were made to some other country not named in the report. As explained above, the sampling procedure will result in completely omitting from the statistics the low-valued shipments in the sampled universe of commodities where none are selected in the sample, and shipments valued less than $501 are omitted from all the commodity statistics.

Effect of Sample Estimating Procedures on the Reliability of the Data

Since statistics based on a sample are not expected to agree exactly with the results that would be obtained from a complete tabulation, the totals in this report are subject to some degree of sampling variability.

Canada Data.—For Canada, shipments in the value range of $501-$1,999 account for about 9 percent of the total value of exports to that country. There are many commodities where only one shipment (or a very few shipments) valued $501-$1,999 is made to Canada per month. Each of these commodities has at least 1 chance in 10 of having a shipment selected in the sample. When this happens, multiplication of the selected item by 10 results in considerable over-estimation of the $501-$1,999 segment of trade. The same type of gross over-statement can result even when there are considerably more shipments if, by chance, the overall selection of 1 out of 10 results in the selection of more than 1 out of 10 for a particular commodity. Conversely, the omission of 9 out of 10 declarations may result in the exclusion from the statistics of all data (or the inclusion of only a small total) for a commodity which actually was exported to Canada in some volume. Most of the omissions will be for commodities with only one or a very few shipments in the $501-$1,999 range, but some omissions and some substantial undercounting caused by under-representation in the sample can be expected, even for commodities where a much larger number of shipments are involved. Also, even where the sample actually selects exactly 1 out of 10 shipments for a commodity, the selected shipment may not be representative of the other 9 in terms of quantity or value, and its inflation by 10 may result in an estimate considerably higher or lower than a compiled total of all 10.

The larger the statistical total, the less the chance that overcounting or undercounting due to sampling will seriously affect the usefulness of the data.

To assist users in identifying individual cases where the sampling variability may be excessive, and to give as much assurance as possible with respect to the accuracy of the other figures, the number of items selected in the 10-percent sample of declarations to Canada is shown for each commodity by a number to the left of the Canada name. The information on the number in sample can be used to obtain, from the following table, an approximation to the sampling variability of the value data for exports of individual commodities to Canada, on a better than 2 chances out of 3 basis.

If the number of $501 - $1,999 shipments which fall in the sample is—	Then the chances are better than 2 out of 3 that a complete tabulation of all shipments individually valued $501 or more would have resulted in a value figure between—	
	The specified estimate reduced by[1] –	And the specified estimate increased by –
0	0	18,200
1	7,200	24,200

300	208,000	220,600
400	240,000	252,600

If the number of $501 - $1,999 shipments which fall in the sample is–	Then the chances are better than 2 out of 3 that a complete tabulation of all shipments individually valued $501 or more would have resulted in a value figure between–	
	The specified estimate reduced by[1] –	And the specified estimate increased by–
500	269,200	281,800
600	296,000	308,600
700	302,200	332,800
800	342,900	355,500
900	363,400	376,000
1,000	383,900	396,500
Over 1,000[2]	$12,500\sqrt{N}$	$12,500\sqrt{N}$

[1] The actual value of shipments cannot be less than 1/10 of the estimated amount shown in the report. Figures in this column can be ignored if use of them for a particular total would bring the lower limit below 1/10 of the estimate.

For number of shipments not explicitly listed in column one, a straight line interpolation can be used, i.e.,: If the number in sample is 23, take the difference between the estimated reduction for 20 and 30 (65,600-52,500 = 13,100) and divide this by 10 (30-20) to get the unit increment (13,100÷1,310). In this case the increments for the three units added to the figure for 20 (52,500+3,930) or $56,430, is the total by which the specified estimate should be reduced.

[2] The sampling variability for commodities with more than 1,000 in the sample of $501 to $1,999 shipments may be calculated by multiplying 12,500 by the square root of N ($12,500\sqrt{N}$, where N is the number of shipments in the sample.

For example, if the value of exports of a commodity to Canada is shown as $150,000 and the number in sample at the left of the country name is 4, reference to the variability table shows that the chances are 2 out of 3 that the fully compiled figure would fall between $127,700 and $183,500. This range was obtained by subtracting from $150,000 (the published figure) the $22,300 shown in the first column of the table on the line for 4 in the sample, and adding to $150,000 the $33,500 shown in the second column of the table. The range of sampling variability limits can be obtained in the same way for the combined value of two or more commodities, or for cumulations of monthly data. The total of the number in sample for all of the accumulated items will indicate which line in the variability table will be applicable to the accumulated value total. The absence of any figure to the left of the country name for Canada means that no $501-$1,999 item for the commodity to Canada was selected in the sample. In this event, the data shown in the report for Canada consists of fully compiled information for shipments valued $2,000 and over. Undercounting due to sampling is a possibility, as explained above, but no overcounting due to estimating procedures is involved. In the variability table, the line for "0" in sample will apply.

The reliability of each of the dollar figures obtained in the manner described above will be an approximate guide to the reliability of the matching net quantity figures wherever such net quantities are shown for a commodity. For technical reasons, the sampling variability of the net quantity data will be somewhat more than for the dollar value figures.

Data for Countries Other Than Canada.—For countries other than Canada, shipments in the value range of $501-$999 account for only about 1 percent of the total annual value of exports to these countries. Therefore, it is believed that the figures in this report can be used, for most statistical purposes, in the same way as if they were fully compiled. With a 50-percent sample of low-valued shipments to countries other than Canada, the sampling variability for exports by all methods of transportation will almost always be low, either in terms of actual magnitude or in percentage terms. The following guide has been prepared as a rough indication of the confidence with which the totals for exports to countries other than Canada by all methods of transportation can be used:

1. Totals valued over $500,000 will almost always have a sampling error of less than 1 percent.
2. Totals valued $100,000 to $500,000 generally have a sampling error of less than 2 percent.
3. Totals valued $5,000 to $99,999 generally have an absolute sampling error of less than $5,000.
4. Totals valued less than $5,000 generally have an absolute sampling error of less than $2,000.

In view of the relatively low level of sampling variability involved in most of the totals in this report, it is assumed that most users will not need to know the extent to which any given figure is based on estimated data. This report, therefore, does not give information as to the number of shipments in the sample for countries other than Canada. However, information as to the number of shipments in the sample on which given totals are based may be obtained from the Bureau of the Census, possibly with a charge for the work involved. This information may be used to obtain a rough indication of the estimated portion of the total.

Commodity Totals.—The accuracy of commodity totals will be affected by both the 10-percent sample for Canada and the 50-percent sample for other countries. For commodities where there were sample shipments to Canada, the number in sample for Canada can be used, in the same way as described previously for Canada data, to obtain from the variability table an approximate measure of sampling variability for the total as a result of the 10-percent sample. Some further allowance should be made for the possibility of additional variability in the commodity total arising from the 50-percent sample for countries other than Canada, but for most commodity totals it is believed that the sampling variability introduced by the estimating procedures as a whole will not affect the usefulness of the data for most statistical purposes.

EXPORTS OF FOREIGN MERCHANDISE

Exports of foreign merchandise are between 1 and 2 percent of the value of total exports and the number of shipments is relatively small. Consequently, the sampling variability of the statistics on exports of foreign merchandise in percentage terms is generally somewhat greater than that for exports of domestic merchandise. As is the case with exports of domestic merchan-

BEST DOCUMENT AVAILABLE

dise, sample data are combined with the fully compiled data in the commodity by country totals (and in the commodity totals) for exports of foreign merchandise. The sampling variability of the estimates of exports of foreign merchandise can be approximated in the same manner as that for estimates of domestic merchandise.

SOURCES OF ERROR IN THE STATISTICS

Export figures are subject to the possibility of errors which may arise from various sources. Among these are errors in the reporting and/or processing of information as to commodity classification, net quantity, value, and other statistical factors, month or year of inclusion in statistics (see paragraph on Monthly and Annual Carryover, above), and errors which may result from the sampling of certain export shipments. (See the explanation of sampling procedures elsewhere in this explanation.) For exports to Canada, the statistics are undercounted due to the nonreceipt of some Shipper's Export Declarations. In order to minimize errors, the procedures used to compile the statistics include clerical and computer processing checks designed to protect the accuracy of the data to the fullest practicable extent.

REVISIONS TO THE STATISTICS

The revision policy adopted effective with the 1977 statistics, providing for corrections once each year to the monthly statistics for the prior year, is currently under review. In the interm, special announcements as warranted concerning significantly large errors in the statistics are published in the front of this report. In accordance with the policy, the data in this report reflect the cumulation of unrevised monthly statistics as they were initially released.

SOURCES OF FURTHER INFORMATION ABOUT FOREIGN TRADE STATISTICS

Summary export and import statistics are published monthly in report FT 900, Summary of U.S. Export and Import Merchandise Trade, and report FT 990, Highlights of U.S. Export and Import Trade. Additional export statistics are published monthly in report FT 410, U.S. Exports, Schedule E Commodity by Country, and annually in reports FT 450, U.S. Exports, Schedule E Commodity Groupings by World Area, and FT 455, U.S. Exports, World Area by Schedule E Commodity Groupings. A description of the foreign trade statistics program is furnished in the Guide to Foreign Trade Statistics. The Guide contains an explanation of the coverage of the statistics and provides sample illustrations of the content and arrangement of the data presented in individual foreign trade reports and tabulations.

Supplementary information and explanations of interest to users of foreign trade statistics (such as notices of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classification, changes in statistical procedures, etc.) are included as special announcements in current issues of the statistical publications. Copies of foreign trade reports and tabulations are available for public reference use at Department of Commerce field offices and other reference locations. Reports providing additional detail compiled but not published may be obtained on a cost basis.

A discussion of the history of foreign trade statistics, containing references to additional sources of historical trade data, appears in Historical Statistics of the United States, published by the Bureau of the Census. Copies are available at most libraries.

For further information regarding the foreign trade statistics, request should be made to the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233.

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 1. ANIMAL AND VEGETABLE PRODUCTS—Continued

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 1. ANIMAL AND VEGETABLE PRODUCTS—Continued

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 1. ANIMAL AND VEGETABLE PRODUCTS—Continued

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 1. ANIMAL AND VEGETABLE PRODUCTS—Continued

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 1. ANIMAL AND VEGETABLE PRODUCTS—Continued

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 2. WOOD AND PAPER;PRINTED MATTER—Continued

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 2. WOOD AND PAPER;PRINTED MATTER—Continued

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Schedule B Commodity number, description, and unit of quantity

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities.)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities.)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 3. TEXTILE FIBERS AND TEXTILE PRODUCTS—Continued

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 4. CHEMICALS AND RELATED PRODUCTS—Continued

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 4. CHEMICALS AND RELATED PRODUCTS—Continued

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 4. CHEMICALS AND RELATED PRODUCTS—Continued

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 4. CHEMICALS AND RELATED PRODUCTS—Continued

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities.)

SCHEDULE 4. CHEMICALS AND RELATED PRODUCTS—Continued

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 4. CHEMICALS AND RELATED PRODUCTS—Continued

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities.)

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 4. CHEMICALS AND RELATED PRODUCTS—Continued

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities.)

SCHEDULE 4. CHEMICALS AND RELATED PRODUCTS—Continued

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 4. CHEMICALS AND RELATED PRODUCTS—Continued

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 4. CHEMICALS AND RELATED PRODUCTS—Continued

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities.)

SCHEDULE 4. CHEMICALS AND RELATED PRODUCTS—Continued

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data. OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Schedule B Commodity number, description, and unit of quantity

SCHEDULE 4. CHEMICALS AND RELATED PRODUCTS—Continued

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 4. CHEMICALS AND RELATED PRODUCTS—Continued

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 5. NONMETALLIC MINERALS AND PRODUCTS—Continued

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 6. METALS AND METAL PRODUCTS—Continued

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Schedule B Commodity number, description, and unit of quantity		
Country of destination	Net quantity	Value (Dollars)
SCHEDULE 6. METALS AND METAL PRODUCTS—Continued

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 6. METALS AND METAL PRODUCTS—Continued

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Schedule B Commodity number, description, and unit of quantity

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Schedule B Commodity number, description, and unit of quantity

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 6. METALS AND METAL PRODUCTS—Continued

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 6. METALS AND METAL PRODUCTS—Continued

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

Table 1. Schedule B Commodity by Country—Domestic Merchandise

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities.)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data. OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities.)

BEST DOCUMENT AVAILABLE

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities)

SCHEDULE 7 SPECIFIED PRODUCTS,MISCELLANEOUS & NONENUMERATED PRODUCTS—Continued

Table 1. Schedule B Commodity by Country—Domestic Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities.)

Table 2. Schedule B Commodity by Country—Foreign Merchandise—Continued

(See "Explanation of Statistics" for information on coverage, valuation, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities.)
